SM2110P  

**Monoclonal Antibody to Chorionic Gonadotropin (hCG) (beta 4 epitope) - Purified**

**Alternate names:** CGB, CGB3, Choriogonadotropin subunit beta, beta hCG, hCG-beta

**Quantity:** 0.5 mg  
**Concentration:** 1.0 mg/ml  
**Background:** Human chorionic gonadotropin (hCG) is a glycoprotein hormone produced by trophoblastic cells of the placenta beginning 10 to 12 days after conception. Maintenance of the fetus in the first trimester of pregnancy requires the production of hCG, which binds to the corpus luteum of the ovary which is stimulated to produce progesterone which in turn maintains the secretory endometrium. hCG is present only in trace amounts in non pregnant urine and sera. It rises sharply during pregnancy. hCG is composed of two non identical, non covalently linked polypeptide chains designated as the a and b subunits. The a subunit of HCG is nearly identical to that of thyroid stimulating hormone (TSH), follicle stimulating hormone (FSH) and luteinizing hormone (LH). A germ cell tumor which is positive for cytokeratin, placental alkaline phosphatase (PLAP) and HCG but negative for EMA and AFP is probably a choriocarcinoma.

**Uniprot ID:** P01233  
**NCBI:** NP_000728.1  
**GeneID:** 1082  
**Host / Isotype:** Mouse / IgG1  
**Recommended Isotype Controls:** SM10P (for use in human samples), AM03095PU-N  
**Clone:** INN-hCG-24  
**Immunogen:** Human CG. Spleen cells from immunised mice were fused with cells of the NS1/1-Ag4.1 mouse myeloma cell line.

**Format:**  
**State:** Liquid purified IgG  
**Purification:** Ion exchange chromatography  
**Buffer System:** PBS containing 0.09% Sodium Azide

**Applications:** ELISA. Radioimmunoassay. Other applications not tested. Optimal dilutions are dependent on conditions and should be determined by the user.

**Specificity:** This antibody is a high affinity antibody recognising the beta 4 epitope on the hCG. It may be used in combination with INN-hCG2, 32 and 45.  
**Species:** Human. Other species not tested.

**Storage:** Store the antibody undiluted at 2-8°C for one month or (in aliquots) at -20°C for longer.
SM2110P: Monoclonal Antibody to Chorionic Gonadotropin (hCG) (beta 4 epitope)
- Purified

Avoid repeated freezing and thawing.
Shelf life: one year from despatch
