

CD16:FITC Antibody

Catalog No.:	SP6229CP
Quantity:	50 µg
Concentration:	0.1 mg/ml
Background:	Is a 50-65kD cell surface molecule which exists in two forms - a transmembranous form expressed by NK cells and some T cells and a phosphatidylinositol linked form expressed by granulocytes. CD16 is a low affinity receptor for IgG (FcR III), and is an important receptor mediating ADCC by NK cells.
Immunogen:	Normal human peripheral granulocytes
Format:	State: Liquid Purification: Purified IgG Buffer System: Phosphate buffered saline, pH7.4, containing 1% BSA and 0.09% sodium azide Label: FITC
Applications:	FACS Other applications not tested. Optimal dilutions are dependent on conditions and should be determined by the user.
Storage:	Keep as concentrated solution. Store at 4

For research and in vitro use only. Not for diagnostic or therapeutic work.
